

Operation Storm

The Evil Agenda

The plan from the Cabal is brilliant, but is beginning to lose its footing and become very difficult to implement as we become more and more people seeing through it and acting. ❤️

It's easier to fool a man than to convince him that he's been fooled. -Mark Twain.

How can we control and ultimately eliminate all people on the entire planet in a way that is difficult to see and question?

- A virus.

How do we best support the process?

- By bribing/threatening/eliminating all our contacts and positions within all crucial decision-making bodies as well as all media. We know that people in a panic will turn to us for a solution, so we don't have to prove that the virus exists, but they will do it for us through a test we provide. (The inventor of the test was eliminated in the fall of 2019.)

How do we create contradictions?

- Those people who, in their fear, want to protect themselves, will see all other people as a threat to their survival. They will want to help report this threat, and can do so through various government agencies that we provide.

In this way, with people's permission, we can imprison and kill other people who for us pose a problem. A win-win situation.

How do we keep the process going in the best way?

- By using our tests in such a way that they become proof that the threat exists. Hence we can control its ups and downs and thus slowly break people down so that their only choice is to do as we say or lose their freedom altogether.

How do we get total control?

- People in a panic will initially agree to anything. After that, we already have well-functioning strategies and collaborations when it comes to additional protection, and these are, among other things, our vaccines that we provide and that we can distribute worldwide today. Once people agree to receive these, shall we say new modified vaccines, then the path to total control is guaranteed.
